<b>Price:</b>	<b>6.200,78 €</b> <b>(nett:5.210,74 €)</b>

### Product description

This high-quality "Turbo IV" wheel set for the Porsche Cayenne E3/9Y0, model year 2018 and later, is an excellent choice for drivers who value both functionality and aesthetic elegance. The set consists of two different dimensions: the front rims measure 10J x 22 with an offset (ET) of 48, while the rear rims measure 11.5J x 22 with an ET of 61. This size distribution supports optimised driving dynamics and improves the visual appearance of your vehicle.

The rims bear the OEM number 9Y0601025BSOC6KPL, which ensures their authenticity and compatibility with the Porsche Cayenne model 9Y0. As original Porsche parts, they guarantee the highest quality and accuracy of fit, resulting in uncomplicated installation and long-lasting reliability.

These rims are new and unused and come in immaculate condition, free from any damage. They are specially designed for summer use, making them an ideal choice for the warmer months. Their robust construction ensures excellent performance and durability, even under demanding conditions.

In addition, these rims feature the "KPL" feature code, which indicates that they are a complete set and are intended for installation on both sides of the vehicle (left = right) and at the rear. This makes selection and installation easier, as there are no specific side assignments to consider.

Overall, this wheel set offers the perfect combination of performance, safety and style, optimally emphasising the character of your Porsche Cayenne while improving its driving characteristics.
