Price:	19.873,00 € (nett:16.700,00 €)

Product description

This set of 20-inch magnesium rims in silk matt black is specially designed for the Porsche 718 GT4 RS and Spyder RS models of the 982 series. The rims offer an excellent combination of style and performance, ideal for drivers who value both aesthetics and functionality.

The front axle is equipped with 8.5J x 20 ET61 rims, while the rear axle has 11J x 20 ET50 rims. These dimensions enable an optimal fit and weight distribution, resulting in improved driving characteristics. The rims are listed under OEM numbers 98204460317 and 98204460307, confirming their authenticity as Porsche genuine parts.

These rims are suitable for tyres of sizes 245/35 ZR20 on the front axle and 295/30 ZR20 on the rear axle, ensuring excellent traction and stability at high speeds. The magnesium construction offers exceptional strength with reduced weight, improving the overall performance of the vehicle by reducing unsprung masses.

The condition of the rims is listed as "used", but they are in very good condition and undamaged. This makes them an excellent choice for drivers looking for original parts in excellent condition without paying the new price. In summary, these rims are an excellent choice for owners of a Porsche 718 GT4 RS or Spyder RS who value originality, performance and style.

Technical specifications
